
Revised list of diseases reportable to the National Notifiable Diseases Surveillance System (NNDSS)

On 8 February 2000 the Strategic Steering Committee of the Communicable Diseases Network Australia New Zealand agreed to a revised national list of diseases to be reported to the NNDSS. In the past, not all diseases reported to the NNDSS have been notifiable in all States and Territories. *Communicable Diseases Intelligence* will begin reporting on the revised list from 1 January 2001.
