1 Introduction ....................................................................................................... 1

PART ONE: VOLATILE SUBSTANCE MISUSE AS A PROBLEM

2 Prevalence and patterns ................................................................................... 7
  2.1 Patterns of volatile substance misuse ....................................................... 7
  2.2 Volatile substance misuse around the world .......................................... 8
  2.3 Patterns of VSM in Australia .................................................................. 9
  2.4 VSM among Indigenous Australians ....................................................... 10
  2.5 Summary .................................................................................................... 13

3 Why do some people inhale volatile substances?
Correlates and causes ....................................................................................... 14
  3.1 Correlates of inhalant use ...................................................................... 14
  3.2 Causes and reasons ................................................................................ 15
  3.3 Explaining VSM in Indigenous communities .......................................... 17
  3.4 Summary .................................................................................................... 18
4 Problems associated with VSM ................................................................. 19
  4.1 Problems experienced by volatile substance misusers .................... 20
    4.1.1 Immediate effects ..................................................................... 21
    4.1.2 Longer-term effects .................................................................. 21
    4.1.3 Mortality and morbidity ......................................................... 23
    4.1.4 Social effects ........................................................................... 24
  4.2 Problems experienced by families ................................................... 24
  4.3 Problems experienced by local communities .................................... 26
  4.4 Problems experienced by the wider society .................................... 26
  4.5 Summary ....................................................................................... 27

PART TWO: INTERVENTIONS

5 Supply reduction .................................................................................. 31
  5.1 Product modification ....................................................................... 31
    5.1.1 Replacement of harmful or psychoactive components ............ 31
    5.1.2 Addition of deterrent chemicals ............................................. 32
    5.1.3 Package modification .............................................................. 33
  5.2 Introducing non-sniffable substitutes for petrol: aviation fuel and Opal .. 34
  5.3 Locking up petrol supplies ............................................................. 38
  5.4 Restricting sale of VSM products ..................................................... 38
    5.4.1 Legislative approaches to sales restriction .............................. 38
    5.4.2 Voluntary approaches to sales restriction ............................... 39
  5.5 Summary ....................................................................................... 41

6 Demand reduction I: Community-based approaches .......................... 44
  6.1 Community-based approaches in remote Indigenous communities ...... 44
    6.1.1 Western Australian Working Party on Petrol Sniffing ............... 44
    6.1.2 Community-based approaches in Central Australia ................. 45
    6.1.3 Healthy Aboriginal Life Team (HALT) ...................................... 45
    6.1.4 Petrol Link-up ........................................................................ 47
    6.1.5 Makin’ Tracks ........................................................................ 48
    6.1.6 Central Australian Youth Link-Up Service (CAYLUS) ............... 50
    6.1.7 Mt Theo-Yuendumu Substance Misuse Program ...................... 51
    6.1.8 Factors inhibiting or enhancing the success of programs in remote communities ................................................. 51
  6.2 Community-based approaches in urban and regional locations ........ 52
    6.2.1 Sunshine Chroming Awareness Program (Melbourne) .......... 53
    6.2.2 Cairns Inhalant Action Group ............................................... 53
    6.2.3 Connecting Koori Kids and SEERS ....................................... 54
    6.2.4 Mount Isa Volatile Substance Misuse Action Group ............... 55
    6.2.5 Local government responses ............................................... 55
  6.3 Conclusion: meeting the needs of young people ............................. 56
  6.4 Summary ....................................................................................... 56
7 Demand reduction II: Education, youth and recreational programs .... 58
  7.1 Information and education about VSM ........................................ 58
  7.1.1 Universal drug education ...................................................... 58
  7.1.2 Education provided to known misusers of volatile substances ... 59
  7.1.3 Education targeting communities ......................................... 60
  7.2 Using Indigenous culture—painting, relationships and initiation .... 61
  7.3 Youth-work and recreational programs ...................................... 65
     7.3.1 Recreation in remote communities .................................... 65
     7.3.2 Recreational programs in urban and regional settings .......... 68
     7.3.3 Matching activities with people ....................................... 71
     7.3.4 Targeting programs at groups of volatile substance users ...... 72
  7.4 Education, training and employment ......................................... 72
  7.5 Summary .................................................................................. 74

8 Demand reduction III: Clinical management, counselling, residential and homeland programs ........................................... 76
  8.1 Clinical management of VSM .................................................... 76
  8.2 Counselling, family interventions and after-care ....................... 80
  8.3 Residential treatment and rehabilitation ................................... 82
     8.3.1 Residential programs in North America ......................... 82
     8.3.2 Australian residential programs ...................................... 84
  8.4 Care for people with acquired brain injury (ABI) ....................... 85
  8.5 Homeland centres (outstations) .............................................. 85
     8.5.1 Infrastructure and resources .......................................... 87
     8.5.2 Sustainability .................................................................. 88
     8.5.3 Availability of support and after-care in communities ........ 89
     8.5.4 Mount Theo Outstation: a success story ......................... 89
  8.6 Summary .................................................................................. 90

9 Harm reduction ............................................................................. 93
  9.1 Harm reduction in drug use settings ........................................... 93
  9.2 Harm reduction practices for individuals .................................... 95
  9.3 Summary .................................................................................. 97

10 Law enforcement .......................................................................... 98
  10.1 Legislation governing police powers to intervene in VSM .......... 98
  10.2 Places of safety ....................................................................... 103
  10.3 Community by-laws relating to VSM ...................................... 103
  10.4 Aboriginal community-based police officers ......................... 104
  10.5 Community patrols ............................................................... 105
  10.6 Statutory sanctions for VSM .................................................. 107
  10.7 Community-based sanctions .................................................. 109

Acknowledgments

In addition to all those who contributed to the publication of the previous edition of this review, who we thanked at the time:

The authors would like to acknowledge the following people, who took the trouble to locate and send us material: Alison Mynard, Amanda Moran, Andy Sinclair, Anne Mosey, Barry Newell, Bernadette Murphy, Blair McFarland, Brett Allchin, Brian McCoy, Charles Grant, Charlie Stewart, Christine Rutz, Cindy Van Rooy, Craig San Roque, Dave Willmette, Debra Mill, Gill Shaw, Jan Robertson, Johanna Monk, Julia McLauchlan, Kate Senior, Kath Broadbent, Kim Gates, Maggie Kavanagh, Peter Kay, Priscilla Pyett, Richard Chenhall, Richard Ives, Angela Rizk, Sheree Cairney, Tristan Ray, Vicki Gillick, Will MacGregor and John Wilson. Thank you also to Michelle Ricketts, Sara Ollerenshaw and unnamed reviewers at the Department of Health and Ageing for their support in the preparation of this study.

While writing this review, Sarah was based at the Youth Research Centre at the University of Melbourne. The YRC administered part of the grant and provided Sarah with office space and support.

We are grateful to Peggy Nampijinpa Brown, Johnny Japangardi Miller, Rex Japanangka Forrest, Susie Low and Ruth Bignall from Yuendumu and Mt Theo Outstation for arranging our visit to Mt Theo.

We also thank the Cooperative Research Centre for Aboriginal Health for agreeing to waive any copyright claims arising from the first edition of the review, thereby facilitating sponsorship of this updated edition by the Australian Government Department of Health and Ageing.

A note on terminology:

Throughout this review, the terms ‘Indigenous Australians’ and ‘Aboriginal Australians’ are used interchangeably. Strictly speaking, the former term has a broader connotation, in that it includes indigenous peoples of the Torres Strait Islands as well as those of the Australian mainland and Tasmania, whereas ‘Aboriginal Australians’ excludes Torres Strait Islanders.
This painting was created in a remote community beset by intermittent petrol sniffing. The artists do not wish to be identified.
