EXPLANATORY NOTES (PHDB)

Scope of Data Collection

The scope of the Private Hospital Data Bureau collection are episodes of hospital treatment for admitted patients in all private hospitals and day facilities. For the purposes of this collection, an episode is the period between *admission* and *separation* that a person spends in one hospital, and includes leave periods not exceeding seven days. Admission and separation can be either formal or statistical (refer to definitions).

It is preferable that each episode refer to only one care type (being the descriptor of the overall nature of a service provided). That is, if a patient's care type changes during a hospital stay, it would be preferable for the patient to be statistically separated from one episode for the first care type and statistically admitted for another episode for the new care type, so that two episode records are submitted.

For further information about the HCP data requirements, please refer to the following legislation:

- *Private Health Insurance Act 2007*
- Private Health Insurance (Health Insurance Business) Rules 2010

Reporting Requirements

The private hospital will provide a monthly data submission to the Department within 6 weeks after the end of a hospital separation month for each episode. For example, a data file for all separations that occurred during the month of July must be submitted to the Department by mid September.

Notes about the specifications

The ***data item column*** indicates the short name for the data item and, where applicable, the reference number for the item in the National Health Data Dictionary as accessed via the Metadata Online Registry (METeOR) at: <http://meteor.aihw.gov.au/content/index.phtml/itemId/237518>

The ***obligation column*** indicates whether provision of each particular data item is:

- M – Mandatory
- O – Optional

The ***position column*** indicates the position within the fixed file format that each data item is to be reported.

The ***type and size column*** indicates the number and type of character/s the data item should contain where:

- A indicates the data item contains alphanumeric characters (alphabetic, numeric and other special characters). Data must be left justified.
- N indicates the data item contains numeric characters (numbers 0 to 9) only. Data items must be right justified and zero-prefixed to fully fill the item unless otherwise stated in the coding description. All values must be positive.

The ***format column*** indicates the format of the characters of the data item:

DDMMYYYY indicates the data item contains date information where DD represents the day, MM represents the month and YYYY represents the century and year. For example, 5 July 2006 would be entered 05072006

hhmm indicates the data item contains time information based on a 24-hour clock, where hh represents the hour and mm represents the minutes. For example 2.35pm would be entered 1435.

blank fill, in relation to a data item, means that the data item is filled with blank spaces.

zero fill, in relation to a data item, means the data item is filled with zeros.

zero prefix means that leading zeros are to be inserted if necessary to ensure that the number of characters in the entry matches the data item size specified for the item.

Charges – supply in dollars and cents (omit decimal point) with leading zeros to fully fill item. All values must be ≥ 0 (i.e. negative charges not permitted). An entry of 000000000 means that no benefit/charge was recorded. Zeros are valid when this item cannot be separately identified but was reported under another charge item.

The ***repetition column*** indicates the number of times the data item is repeated within the data file.

The ***coding description column*** provides the definition for the data item, valid values and any additional information to clarify what data should be reported and how. If a METeOR reference is indicated in the data item column, refer to the National Health Data Dictionary for definition and collection methods.

The ***edit rules column*** outlines the edit checks the Department will run the data through using the Check-It software. These are split into critical errors where data will be rejected and warnings where data will be identified.

The ***error codes column*** indicates the error code attributed to each of the edit checks.

Definitions/acronyms

ACHI means the Australian Classification of Health Interventions.

ADA means the Australian Dental Association.

CCU means the coronary care unit of a hospital.

DRG means the Australian Refined Diagnosis Related Group.

episode means the period of admitted patient care between a formal or statistical **admission** and a formal or statistical **separation**, characterised by only one care type.

formal admission, in relation to a person, means the administrative process used by a hospital to record the commencement of accommodation, care or treatment of the person.

formal separation, in relation to a person, means the administrative process used by a hospital to record the cessation of accommodation, care or treatment of the person.

HDU means the high dependency unit of a hospital.

Hospital means a facility for which there is in force a Ministerial declaration that the facility is hospital under subsection 121-5(6) of the *Private Health Insurance Act 2007*.

Hospital treatment is treatment (including the provision of goods and services) provided to a person with the intention to manage a disease, injury or condition, either at a hospital or with direct involvement of the hospital, by either a person who is authorised by a hospital to provide the treatment or under the management or control of such a person (subsection 121-5, *Private Health Insurance Act 2007*).

Exclusions to hospital treatment (eg treatment provided in an emergency department of a hospital) are specified in the Private Health Insurance (Health Insurance Business) Rules 2010, Part 3, Rule 8.

Inclusions to hospital treatment (eg some Chronic Disease Management Programs not involving prevention) are specified in the Private Health Insurance (Health Insurance Business) Rules 2010, Part 3.

Hospital-in-the-home means the provision of care to hospital admitted patients in their place of residence as a substitute for hospital accommodation. Place of residence may be permanent or temporary (METeOR glossary item ID: 327308).

Hospital-in-the-home care days means the total number of days between HiTH commencement date and HiTH completion date.

Hospital-in-the-home care visit days means the total number of days during a HiTH care episode that the patient was actually visited/received a service. This might be calculated by subtracting HiTH care completion date from HiTH care commencement date and then subtracting total leave days.

ICD-10-AM means 'The International Statistical Classification of Diseases and Related Health Problems, 10th revision, Australian Modification, published by the National Centre for Classification in Health (Australia).

ICU means the intensive care unit of a hospital.

insurer means a private health insurer.

MBS means the Medicare Benefits Schedule, comprising:

- (a) the *Health Insurance (Diagnostic Imaging Services Table) Regulations 2005*; and
- (b) the *Health Insurance (General Medical Services Table) Regulations 2005*; and
- (c) the *Health Insurance (Pathology Services Table) Regulations 2005*;

as in force from time to time, or any Regulations made in substitution for those Regulations.

METeOR (metadata online registry) for national data standards.

miscellaneous service code means any miscellaneous hospital-specific or insurer-specific non-MBS billing code.

NHDD means the (most current version of the) 'National Health Data Dictionary'.

NICU means the neonatal intensive care unit of a hospital.

overnight-stay patient means a person who is admitted to and separates from a hospital on different dates.

PHIAC means Private Health Insurance Administration Council

PICU means the paediatric intensive care unit of a hospital.

procedure means clinical intervention that is surgical in nature, carries a procedural risk, carries an anaesthetic risk, requires specialised training, and/or requires special facilities or equipment only available in an acute care setting

same day patient means a person who is admitted to and separates from a hospital on the same date.

SCN means the special care nursery of a hospital.

statistical admission, in relation to a person, means the administrative process used by a hospital to record the commencement of a new episode of care that provides the person with a new care type during a single hospital stay.

statistical separation, in relation to a person, means the administrative process used by a hospital to record the cessation of an episode of care of the person during a single hospital stay.

Guide for Use

Accommodation charges/benefits - refer to private, shared or high dependency accommodation for any Accommodation Type (i.e. advanced surgical, surgical, medical, rehabilitation, obstetrics, and psychiatry). All hospital episodes must have a charge/benefit component relating to accommodation, unless it was bundled, or the hospital billed a procedure-only fee. Therefore, cases such as chemotherapy should either have a charge/benefit component in "bundled" or "accommodation" or "theatre". They should not be reported as "other".

Bundled charges/benefits - refer to an aggregate of 2 or more charges billed by the hospital/paid by the insurer, such as case payments by DRG or MBS.

CCU charges, benefits, days and hours - exclude ICU, SCN, NICU, PICU and HDU in calculations.

Hospital-in-the-home (HITH) – Episodes which include HITH services should be reported in a manner consistent with claiming practice. For example,
(a) HITH services which are part of an admitted psychiatric program and are claimed as a single same day service must be reported as single same day episode. This includes psychiatric patients that remain in an admitted HITH program over extended periods of time.
(b) If hospital claims are submitted to insurers at the conclusion of the admitted psychiatric HITH program, then one episode must be reported spanning the length of the program.

ICU charges, benefits, days and hours - include NICU and PICU; exclude SCN, CCU or HDU in calculations.

Infant weight neonate - For live births, birth weight should preferably be measured within the first hour of life before significant postnatal weight loss has occurred. While statistical tabulations include 500 g groupings for birth weight, weights should not be recorded in those groupings. The actual weight should be recorded to the degree of accuracy to which it is measured. In perinatal collections the birth weight is to be provided for live born and stillborn babies.

Minutes in Theatre - from the time the patient entered the operating theatre or procedure room until the time the patient left the operating theatre or procedure room. For example, coronary angiography/angioplasty, lithotripsy and ECT must have minutes of operating theatre time reported, even though they are performed in a procedure room rather than a theatre.

Other charges/benefits – refer to services which cannot be categorised as accommodation, theatre, labour, ICU, pharmacy, prosthesis, bundled, SCN, CCU or HITH. It excludes ex-gratia charges, television, phone calls, extra meals, FED, reversals or journal adjustments.

Palliative care status and days – calculations to include care provided in: a palliative care unit; a designated palliative care program; or under the principal clinical management of a palliative care physician or in the opinion of the treating doctor, when the principal clinical intent of care is palliation.

Principal MBS item - select on the basis of: (a) the patient's first visit to a theatre or procedure room/coronary angiography suite; and (b) the MBS with the highest benefit amount. The principal MBS item relates to theatre or procedure room/angiography suite, and not to the medical item billed by the

doctor. It may not necessarily correlate to the Principal Procedure Code. For example, renal dialysis, coronary angiography/ angioplasty, same-day chemotherapy, lithotripsy, ECT and sleep studies must have an MBS item number reported, even though they are procedure room rather than theatre. Where possible, any services that do not have a valid MBS item should be reported in the Miscellaneous Service Code item (item 53).

Principal Item Date – The date on which the principal MBS item is carried out. If there is no principal MBS item, then the date that the first Miscellaneous Service Code item was carried out may optionally be entered.

Qualified days for newborns - The number of qualified days is calculated with reference to the date of admission, date of separation and any other date(s) of change of qualification status: the date of admission is counted if the patient was qualified at the end of the day; the date of change to qualification status is counted if the patient was qualified at the end of the day; the date of separation is not counted, even if the patient was qualified on that day. The normal rules for calculations of patient days apply.

SCN charges, benefits, days and hours - exclude NICU, ICU, CCU, PICU and HDU in calculations.

Secondary MBS item – - The secondary MBS items relate to theatre, and not to the medical item billed by the doctor. It may not always correlate to the Procedure Codes (ICD-10-AM). Where possible, any services that do not have a valid MBS item should be reported in the Miscellaneous Service Code item (item 53).

Theatre charges/benefits – refer to a theatre/procedure room/ angiography suite. This applies to theatre charges, benefits and minutes in theatre

Re-admission within 28 days – Planned re-admission refers to planned re-admission within 28 days from this or another hospital. Note: do not include transfers from another hospital as re-admissions.

Data Quality

Error Codes

W (represents a warning where an edit rule has been identified) – the record will be accepted and private hospitals notified

E (represents an error where an edit rule has failed) – the record will be rejected and private hospitals notified
